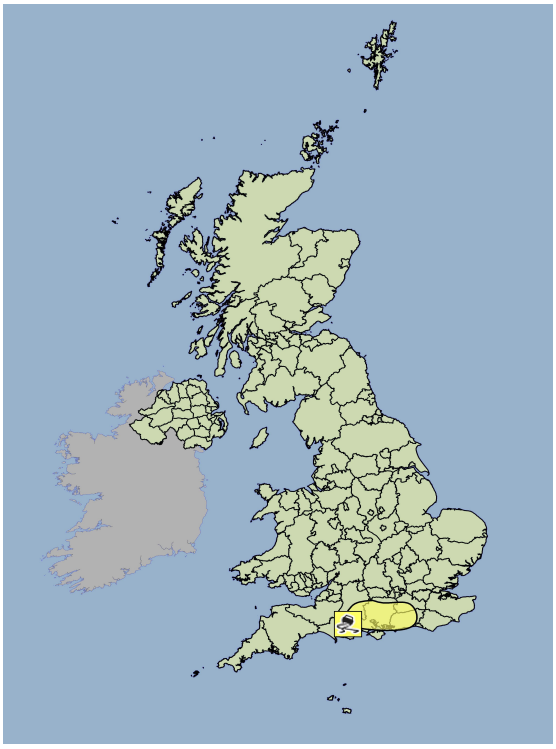
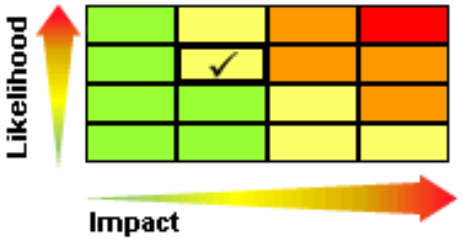
National Severe Weather Warning Service





Chief Forecasters Assessment
The low pressure area which brought heavy showers on Monday is moving away, allowing skies to clear and temperatures to drop, making ice likely to form on untreated roads and pavements. Cloud arriving from the west around dawn could bring temperatures above zero again.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **00:05 on Tue, 04th Mar 2014** until **07:00 on Tue, 04th Mar 2014**

Surfaces left wet from Monday's rain will freeze on Tuesday morning to bring the risk of icy stretches on untreated surfaces.

The public should be aware of the risk of difficult driving conditions.
